Habasit's 03326-05 Seamless Belt

Purpose-built for Triangle VFFS machines

Your Triangle VFFS machine has a rhythm: draw the film, form the bag, fill it, seal it, then do it again. At production speed, that rhythm depends on one quiet but critical connection: the belt that moves film exactly where the process needs it. If that connection loses grip or drifts out of position, a consistent feed can suffer.

That's where Habasit's new 03326-05 Seamless Belt comes in. The 03326-05 belt is designed to keep film moving accurately through Triangle VFFS machines, cycle after cycle.

This purpose-built, drop-in replacement for Triangle VFFS machines simplifies belt changes. Its build quality provides a long service life, reducing the need for future replacements. Add responsive Habasit service and access to a broad belting portfolio, and your equipment has the support to keep production moving, from the first bag to the last.

The belt features:

- Drop-in replacement for the Triangle VFFS machines
- Precise, slip-free film control for consistent bag forming and sealing
- Long service life thanks to abrasion resistance and dimensional stability

Habasit's 03326-05 Seamless Belt

Draw. Form. Fill. Seal. Repeat.

1. **High-friction belt surface**
   Maintains consistent grip and feeding accuracy without marking or damaging film.

2. **Diagonal slots with holes**
   Optimized for vacuum-assisted film handling.

3. **Seamless, molded cover**
   Helps extend belt life and reduce replacements. The abrasion-resistant cover is molded as one piece with the belt, eliminating splice-related weaknesses.

4. **XL pitch drive with tooth-side groove**
   The pitch drive eliminates belt slippage and feeds film precisely, while the groove further enhances vacuum performance.

5. **Dimensionally stable belt**
   Resists elongation, which provides stable tracking and process reliability over time.

Technical Data

Product Code	Dimensions		Conveying side			Pulley side surface		
	L	W	Material	Color	Surface	Material	Color	Surface
03326-05 Seamless Belt	34" (863.6 mm)	1.78" (45.2 mm)	Polyurethane rubber	Clear	Slots with holes	Polyurethane polyester	Orange	Teeth with centered groove
