

# Interface Scripting Module

By connecting Chargemaster Toolkit® and your patient financial system with Interface Scripting Module, you can automate manual data entry, error-proof your chargemaster transfer, and complete the cycle of data flow.

Even with Chargemaster Toolkit, the industry-leading chargemaster solution, your chargemaster that resides on your hospital information system may still be at risk for data integrity issues. If your hospital manually transfers its chargemaster data to its patient financial information system, even a current, complete, and accurate chargemaster file is easily compromised.

Craneware's Interface Scripting Module ensures quick, secure, and error-free transfer of your chargemaster changes and edits by automatically integrating charge line items added, modified, or deactivated in Chargemaster Toolkit with your financial system. The system gives you the flexibility to control updates according to your facility's preference. You can send all changes, selected sections from one particular general ledger department, or one specific set of price or code changes.

An intuitive and flexible tool, Interface Scripting Module replaces a tedious, unnecessary chore with a seamless process that prevents mistakes and promotes compliance for your hospital.

### Secure, auditable technology

With Interface Scripting Module, built-in user permissions and audit elements added to each charge item let you maintain full accountability.

If your patient financial system is ever updated or changed, Interface Scripting Module gives you the ability to test changes in complete safety by using a specialized test mode. This feature adds another layer of confidence to the process.

Interface Scripting Module ensures quick, secure, and error-free transfer of your Chargemaster changes and edits to your patient billing system.

The Interface Scripting Module saves time and ensures accuracy by automatically uploading chargemaster changes made with Chargemaster Toolkit to your patient billing system. You have complete control over which changes to upload.

Chargemaster Toolkit® is ranked No. 1 in the Revenue Cycle – Chargemaster Management market category for the ninth year in a row (2006 – 2014), and Bill Analyzer is ranked No. 1 in its category for the fourth year in a row (Revenue Cycle – Charge Capture 2013 – 2014 and Revenue Cycle – Other 2011 – 2012). “2014 Best in KLAS Awards: Software & Services” report, published January 2015. \*HFMA staff and volunteers determined that Chargemaster Toolkit®, Chargemaster Corporate Toolkit®, Bill Analyzer, Online Reference Toolkit® and Interface Scripting Module have met specific criteria developed under the HFMA Peer Review Process. HFMA does not endorse or guarantee the use of these products.

### Real-world experience

Craneware has hands-on experience successfully interfacing with a variety of patient financial systems, including Siemens INVISION, HMS, McKesson HealthQuest, McKesson STAR, MEDITECH MAGIC, and MEDITECH Client/Server and many others. This real-world expertise ensures that Interface Scripting Module works smoothly and reliably.

### Advanced reporting capabilities

With the Pre-Report feature, users can preview and audit all changes before Interface Scripting Module transfers them. Similarly, a Post-Report presents changes already transferred. In fact, users may filter and track any update sent to the financial system. All changes can be summarized and exported into a separate file for easy historical reference.

### Control over your schedule

With Interface Scripting Module, you may upload changes on demand or according to a set schedule. Because you have the option of scheduling any batch to start at any date or time, you no longer have to waste evenings, weekends or holidays making price or code changes that must take effect at a certain time.
