

ACA Enhanced

ACA Enhanced alleviates the stress of health care compliance, reduces the administrative burden, and ensures compliance is checked off your list.

> AUTOMATED, ONGOING FORM CAPTURE, & FILING

Paylocity will track all necessary data for your 1094-C and 1095-C forms, prepare them after year-end, and electronically file them on your behalf.

> MAKE & TRACK OFFER OF COVERAGE

Paylocity will track and populate benefit classifications on the 1095-C form, as well as full-time, medical enrollment, and employment statuses.

> WORKFLOW, ALERTS, & NOTIFICATIONS

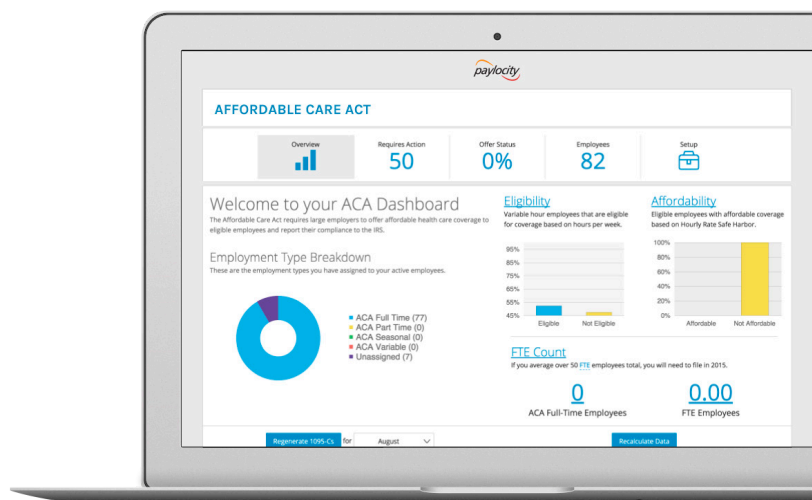

Set up automatic notifications for critical ACA information, including variable employees ending their initial measurement and stability periods, employees who are not enrolled but are eligible, etc.

> IRS NOTICE RESOLUTION

If not dealt with properly, ACA penalties can add up to thousands of dollars. If the IRS raises an issue with your 1095-C filing, Paylocity will advocate for you, insulating your organization from potential fines.

> DASHBOARDS & REPORTS

Leverage the dashboards and reporting capabilities in ACA Enhanced to see where you stand on the basics of ACA by tracking employee eligibility, affordability, and large-employer status.

ACA Enhanced eliminates the need for a time and labor or benefit administration software solution.

***For clients with specific needs that cannot take advantage of ACA Enhanced, ACA Essentials is available for a per-form-filed charge. ACA Essentials includes basic ACA dashboards, reporting, and filing of 1095-C and 1094-C forms. All form data requires manual input.**
