

IQVIA is at the forefront of unlocking the potential of NHS health data to realise future health improvements for the UK and deliver transformative benefits for the patients of today and tomorrow. IQVIA believes that the value of NHS health data is not in the data per se, but in the clinical decision-making it can inform.

Delivering health and value to patients, the NHS and the UK

- Helping to develop 93% of top pharmaceutical and 82% of biotech oncology drugs in 2016 through our clinical research programmes
- Over 250 UK-based clinical researchers, statisticians and data scientists who analyse non-identified real-world data to understand how patients can be treated safely, effectively, and economically
- Innovating through virtual clinical trials, reducing the need for travel
- Analysing 9 million biological samples from clinical trials across the world every year through our state-of-the-art clinical research laboratory services located in Livingston

About IQVIA in the UK

- IQVIA believes in the UK's potential to be a global leader in the life sciences sector, and our investments announced in the 2018 Second Life Sciences Sector Deal further support the UK Government and the industry's aim to make that potential a reality.
- IQVIA is a leading player in, and committed to, the UK's life sciences Sector. The value of our contributions to patients, the NHS and the UK economy include:
 - Largest provider of commercial clinical trials in the UK
 - Helping to develop 93% of pharmaceutical and 82% of biotech oncology drugs through our clinical research programmes
 - Supporting the UK life sciences ecosystem through a £45 million investment over five years in the Second Life Sciences Sector Deal in 2018
 - Conducting research in over 200 NHS clinical trial locations, including four Prime Sites (health data-enabled clinical research sites) across the UK, along with collaborating with Genomics England and Health Data Research UK's (HDR UK) BREATHE and DATA-CAN hubs
