

Connected cars: EU regulation on data-related technologies

REPORT

This new report covers the main EU policy and regulatory initiatives relevant to the deployment of connected and automated mobility in Europe. The EU's overarching policy objective is to achieve a cleaner, safer and more efficient transport system in the EU. This was set out most recently in the European Commission's Third Mobility Package of May 2018 – which includes a strategy to make Europe a world leader in fully automated and connected mobility systems.

Covering developments until 6 December 2019

Regulation made simple

Cullen International provides regulatory and competition law intelligence in telecoms, media, postal and the digital economy - covering developments across Europe, Americas, the Middle East and North Africa, as well as key trends across the globe.

For over 30 years, we have been providing comprehensive, neutral, unbiased, timely information that is trusted by industry and official institutions alike. We are widely recognised as the leading regulatory intelligence provider in the field.

Our subscription services consist of a unique range of alerts, monitoring reports, benchmarks and enquiries that are complemented by our training and custom research services. Our outstanding regulatory library contains over 25 years of source documents linked to expert analysis of events.

We are also regularly selected to carry out important research and studies for the European Commission and other organisations, and we are frequently sought out to chair or make presentations at industry events.

Our Clients

Cullen International is privileged to serve over 250 key market players and public organisations from over 80 countries - all with a serious strategic focus on competition law or regulation in the communications sector. These clients include operators, online service providers, broadcasters, manufacturers, national regulatory authorities, competition authorities and ministries.

Strategically situated in Brussels, we are the eyes and ears on the ground for our clients, maintaining essential close links with all EU institutions, national regulatory authorities and our solid network of national regulatory experts in over 60 countries.

Table of Contents

I. EXECUTIVE SUMMARY	6
A. At a glance	7
1. Latest steps	7
2. Next steps	7
3. Summary	7
a) Connected and automated mobility	8
b) Data protection and access to data	9
c) Cybersecurity	9
d) Liability	9
4. Contacts	10
B. Description	11
1. Connected & automated mobility	11
a) Connectivity: hybrid communication mix	11
b) Automation: from monitored driving to full automation	12
c) Pan-European 5G corridors for testing	14
2. Data protection & access to data	15
a) GDPR & e-Privacy Directive	15
b) B2B and B2G data sharing	16
c) Sector-specific data sharing rules and self-regulation	17
3. Cybersecurity	18
a) EU Cybersecurity Act	18
b) NIS Directive	18
c) General cybersecurity	18
4. Liability	19
II. ANNEXES	21-100
A. Annex I - Trackers	
1. 5G Spectrum requirements	
2. Data sharing and reuse (including PSI Directive)	
3. Directive on Security of Network and Information Systems (NIS Directive)	
4. General Data Protection Regulation (GDPR)	
5. EU Cybersecurity Act	
6. Proposed e-Privacy Regulation	
7. Liability & new technologies	
8. Artificial Intelligence	
B. Annex II – Cross-Country Analysis	
1. Security and personal data breach notification	
C. Annex III - Flashes	
1. Council rejects European Commission's connected car plans proposing Wi-Fi over cellular for short-range communications	
2. EU workshop on use of 5G for connected and automated mobility	
3. France summarises state of play of strategy on automated cars	
4. European Commission does not propose legislation to ease access to private sector data	
5. Data sharing and re-use from the Bits Seminar	
6. EU Cybersecurity Act: a cheat sheet infographic, to-do list and calendar starting now	
7. EU Cybersecurity Act – how were the controversial aspects resolved in final deal?
