

your ERP persona is...

The Researcher

You are a question-asking, answering-finding, info-gathering master of ERP exploration. Whether you are new to the world of enterprise resource planning or just prepping for a new project, you are building up your knowledge about best practices, the types of solutions available, and how your investment will impact the organization. You are learning all the ling <http://demo.leafcolor.com/sportcenter/o> and getting familiar with the marketplace. The conclusions you draw from your research will have a significant impact on your business for years to come.

Tips & Guidance

Start With Self-Assessment

ERP success starts with thorough self-assessment. Where are you now and what do you want to achieve? Examine all angles.

Role Call

ERP is a team effort. Business roles commonly involved include finance, accounting, process and operations, and information technology.

Stay Organized

Make a special point of staying organized and communicating effectively to avoid wasted time and unneeded detours.

Explore the Market

Start with broad scope to account for the big picture, then zone in. Make note of key market players and partners along the way.

Formalize It

Creating a Request for Information (RFI) or Proposal (RFP) document will save valuable time on both research and purchasing.
