A WORD FROM OUR CLIENTS

"From a single source, Vertical Market Software provides us with support and integrated applications that meet the needs of our many divisions and profit centers".

-Wayne Helms, President
The Edd Helms Group, Miami FL

"#1 reason we would recommend VMS would be the support we receive from them, but also I feel that the software is versatile enough to allow you to customize the way you use it to what you need in your business."

-Teresa Johnson, General Manager
Beckman Services, Cincinnati OH

"Changing software seven years ago to Ventus was the best decision our company has made. We have increased profits, have the ability to control data entry, track profitability, and streamline our operations with Ventus. Our main goal was to have software that handled inventory control, service management, and job costing and Ventus excels in these areas and more. The all-inclusive modules work perfectly together creating a seamless way to run our entire business to the best of our ability!"

-Michele Webb, Vice President
Duke Hicks Plumbing & Petroleum, Chattanooga TN
