# GP Tight Head Drums Address a Wide Range of Needs

## OVERVIEW

- ✓ Blow molded in one piece of a special high molecular weight high-density polyethylene, GP drums are extremely strong and rigid.
- ✓ They are lighter than their steel counterpart, making them easier to handle and stack.
- ✓ They will not rust, dent or peel.
- ✓ They cut shipping costs.
- ✓ Extra-large compression molded ring facilitates lifting with parrot-beak equipment, or drums can be easily moved with manual lift carts.
- ✓ Other GP features include: a fully drainable top, sidewall rolling hoops, molded hand hold, sump well molded into drum bottom and protected label surface areas on drum top.
- ✓ Standard GP drums are available in blue, black, white and natural (other colors available on request).
- ✓ Drums can be cleaned and reconditioned.
- ✓ Fully compliant with UN/DOT, UFC, NMFC, USDA, FDA and other corresponding regulations.

Extra-large integrally molded chime provides improved drum handling.

Standard bung configuration of one 2" NPT and one 2" buttress or 3/4" vent offers maximum flexibility. Other bung configurations available.

Fully protected bung area and label area. Head design facilitates complete drainage.

Designed for use with the exclusive Greif samba cap and many other tamper evident caps.

Molded-in sump wells for use with pumping equipment.
