The Patented Bumper Feature Protects the Integrity Filled Drums and Provides Easy De-Nesting for Reuse

OVERVIEW

- ✓ These drums are extremely strong and rigid, yet far lighter than steel drums for easier handling and savings on shipping costs.
- ✓ Their tapered design allows nesting of empty drums for economical transportation and storage.
- ✓ There is no inner liner to crack or fracture, eliminating a potential source of contamination.
- ✓ They are available with lever-lock or bolt-ring style locking bands and in a variety of cover styles to accommodate filling, dispensing and stacking requirements.
- ✓ O-MB Series drums feature molded hand holds for easy manual handling and they can be handled with standard drum handling equipment.
- ✓ They save valuable warehouse space because they are stackable and can be stored outdoors without rusting.
- ✓ They can be cleaned, reconditioned and reused several times, lowering the total systems cost associated with packaging.
- ✓ Customized colors are available.
- ✓ Fully compliant with UN/DOT, NMFC, USDA, FDA and other regulations.

Cover configuration: wide variety of styles available.

Closures: lever-lock style and bolt-ring style. Plastic available for non-UN applications.

Material: high molecular weight high density polyethylene resin.

Patented bumper feature protects the integrity of filled drums and provides for easy de-nesting.

Tapered design allows nesting of empty drums for economical transportation and storage.
