# Silicone Free\* Drums

## \*Not Intentionally Added (NIA)

### Features

- ✓ Our dedicated steel drum plants are internally audited and certified as silicone NIA plants.
- ✓ Internal audits focus on contamination prevention, quality control and silicone testing.
- ✓ Procedures and guidelines are implemented and maintained to prevent contamination.
- ✓ Supplier's commitment to quality.
- ✓ Specific Employees Training Programme.
- ✓ Housekeeping and cleaning practises.
- ✓ Silicone shaking test (or an equivalent) performed upon customer's request.
- ✓ Test reports available per drum batch.

### No Silicone For Paints & Coatings

Our certified silicone NIA plants have implemented specific internal procedures to prevent silicone contamination.

### No Silicone, No Crater, No Claim

Silicone presence generates craters on end-user (ex. automotive) products, resulting in claims and higher costs. Therefore, every silicone NIA drum batch is tested according to customer specifications.

### A Shared Quality Control Process

The frequency of silicone testing is specified by the customer. Quality reports are generated to allow fillers to cut back on their quality checks.

 For more information, talk to your local sales representative.
