Small Plastic Jerrycan

Features

OVERVIEW

- ✓ The DoubleGreen Jerrycans and Bottles are made with a special high molecular weight, high-density polyethylene and can be mono-layer or multi-layer.
- ✓ For a more sustainable option, they can be produced using Green PE made from sugarcane.
- ✓ Can be based ethylene or PCR (Post-Consumer Resin).

20 Litre Jerrycan

- Reduction of up to 15% in weight when compared to a standard jerrycan.

10 Litre Jerrycan

- New stackable design that eliminates the use of a corrugated box for transportation.

5 Litre Agrolight Jerrycan

- Innovative and sustainable packaging that focuses on weight reduction while maintaining mechanical properties.
- Fully compatible with filling lines for C-95—standard jerrycan.

1 Litre Bottle

- Innovative design which promotes weight reduction while increasing sturdiness.
- Fully compatible with filling lines for a 1 litre bottle with smooth walls.
