Printable Puff 4040 Matt

3D effect for your prints

PRINTABLE PUFF 4040 MATTE is a white polyurethane film designed for professional textile decoration. Compatible with eco-solvent and solvent printers, it allows graphics to be printed directly onto the material before being heat pressed onto textiles.

Printable Puff 4040 Matt

APPLICATIONS

- Team apparel
- Corporate clothing
- Leisurewear and casual fashion
- Logos and branding elements
- Creative and dimensional graphic designs

BENEFITS

Raised 3D effect

Creates a unique raised 3D effect after heat pressing, transforming flat printed graphics into a dimensional and tactile design.

Printable Solution

Compatible with eco-solvent and solvent printers, allowing seamless integration into existing professional printing workflows without additional equipment.

Soft Matte Finish

Soft matte finish with a pleasant textile touch, enhancing both the visual appearance and the tactile experience of the final garment.

Creative Differentiation

Adds depth and structure to designs, helping decorators and brands stand out from standard flat print applications.

Fabric Versatility

Suitable for a wide range of textiles including cotton, polyester, and poly-cotton blends commonly used in apparel.

PVC-Free Formulation

Produced without PVC, offering a responsible material choice while maintaining professional performance.
