

Included in the next quarterly upgrade of COMMBUYS are continued improvements to Blanket and Document search capabilities, and system enhancements to support the October 3, 2022, implementation of the COMMBUYS Contract Lifecycle Management tool for Executive Branch users. See details below.

Enhancements and Fixes

Brief Description	Current Experience	New Experience
Improved Blanket search when using multiple criteria	When Purchasers search for Blankets using Vendor Name and other criteria, results are limited to the Vendor Name criteria.	Purchasers may search for Blankets using multiple search fields and receive output results that match their desired criteria. Use of the Any/All operators will continue to be supported.
General Improvements to Document Search processing	Searches may return slower than expected results.	Improvements were made to ensure accurate search results in a timely manner.
Single Sign-On (SSO) for COMMBUYS Contract Lifecycle Management (CLM) Integration	Unavailable	Authorized Executive Department purchasers will be able to login to COMMBUYS through a Single Sign-On portal to access the Contract Lifecycle Management tool.
