

Upstream Exploration Research

Navigate the upstream exploration industry and the latest market trends

Rystad Energy's Upstream Exploration is a unique tool that provides deep insight into global exploration trends, detailed at individual well level, and benchmark exploration performance for companies, geographies, and reservoirs

- **Compare exploration efficiency** by company, country, or basin. Identify which companies/basins achieve lower costs per barrel discovered and higher resources per well
- **Analyse the exploration results** using wellbores and success rates. **Identify high-risk vs. high-reward regions and company performance in wildcat drilling**
- **Access historical and forecasted activity data**, such as wellbore counts, drilling days and exploration spending
- **Cross-check geological attributes with success rates** and resource sizes using parameters like reservoir depth, porosity, depositional environment, and reservoir age
- **Track how much acreage** companies win, retain, or relinquish over time by using awarded acreage, licensed acreage, license status and relinquishment year

Upstream Exploration Research

Solution coverage

What is included

How this helps you

Data

Can be accessed via:
Our proprietary Cube browsers: Gain deep and granular insights using our proprietary databases

Interactive web-based dashboards: Access data in easy-to-use interfaces curated for your workflows

Models: Fully editable, transparent, Excel-based models designed for better decision-making

Exploration Company Benchmarking: Selected E&P companies in a defined geographical area

- Portfolio explorer
- License awards
- Drilling activity
- Discovered resources

Exploration Area Analysis: Complete strategic review of oil and gas exploration in a defined area.

- Resources overview
- Completed license rounds
- Upcoming license rounds

Detailed field-level economic evaluation and opportunities screening

Access historical and forecasted activity data, such as well counts, drilling days, exploration spending, awarded acreage and licensing rounds

Analyse and benchmark reservoir formations using deliverability, costs and efficiency metrics

Assess licensing rounds and awarded acreage to understand competitive positioning

Analytics

The analysis covers both the performance and potential of a compilation of wells, assets, and basins

Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant

Stay up to date on all aspects of the upstream exploration industry through our exploration trends reports, discovery reports, basin reports, and frequent value-adding commentaries

Anticipate future exploration hotspots using forecasted well counts and drilling activity insights

Integrate findings into long-term corporate strategy, M&A screening, and resource replacement planning
