

Australia Renewables & Power Solution

Utility-scale renewables database covering the entire renewables and power sectors across the supply chain, asset analysis, valuations, company portfolios, power mixes and price outlooks for selected regions.

With Rystad Energy's Australia Renewables & Power Solution, you can explore detailed coverage of utility-scale renewable energy projects across Australia and New Zealand. Gain complete visibility into the power purchase agreements in Australia and long-term forecast for Australia's national Electricity Market (NEM).

➔ Request a demo

➔ Granular database **covering solar, wind and energy storage projects** and players throughout Australia and New Zealand

➔ **Asset level performance** across both the National Electricity Market (NEM) & Wholesale Electricity Market (WEM).

➔ **Long term price forecast** for both the NEM & the WEM.

➔ **PPA Data:** PPA Duration (yrs), PPA Volume, PPA counterparties, PPA Price

➔ **Economics:** CAPEX, OPEX, NPV, IRR

How this helps you

Data

Can be accessed via:

Cube Browser: A proprietary desktop application designed to provide advanced access to the extensive energy databases

Interactive web-based dashboards: Global data in user-friendly interfaces to analyze European renewables and power markets and supply chains

Model: Fully editable, transparent, Excel-based model designed for analyzing renewables projects economics

- ✓ PowerCube
 - Australian asset-level coverage for all power-generation sources
- ✓ Australia - Watts Generating Dashboard
- ✓ New Zealand - Watts Generating Dashboard
- ✓ Australia Power & Renewables Project Analysis Dashboard
- ✓ Australia NEM & WEM Price Forecast Dashboard
- ✓ Australia Power Purchase Agreements Dashboard

- **Compare projects,** suppliers and operators
- Perform **deal screening** within the solar and wind markets
- Benchmark **the competitive landscape**
- Evaluate **renewable energy projects**
- Understand **the market share of EPCs, Developers and OEMs.**
- Quickly and easily retrieve information

Analytics

Renewables & Power Analytics: A comprehensive library of expert reports and commentaries

Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant

- ✓ Monthly reports
 - Australia Renewables & Power Trends Report
- ✓ Regular commentaries
- ✓ Ad hoc reports
- ✓ Periodic reports

- Examine **the key trends in the Australian renewables and power markets**
- Get timely analyses of **key renewable energy topics**
