

# Australia Renewables & Power Solution

Utility-scale renewables database covering the entire renewables and power sectors across the supply chain, asset analysis, valuations, company portfolios, power mixes and price outlooks for selected regions.

With Rystad Energy's Australia Renewables & Power Solution, you can explore detailed coverage of utility-scale renewable energy projects across Australia and New Zealand. Gain complete visibility into the power purchase agreements in Australia and long-term forecast for Australia's national Electricity Market (NEM).

→ Request a demo

→ Granular database **covering renewables and conventional sources of electricity** installed and upcoming projects

→ **Hourly power price forecast** for 2024 - 2050 for select European countries developed and provided by Volt Power Analytics for 30 different weather years

→ **Economic evaluation** of more than 40,000 utility-scale solar PV, onshore and offshore wind assets in Europe

→ **Power market data** – granular data on capture rates, price spreads, generation, demand, frequency control/ancillary services & cross border flows for power markets in Europe

→ **Supply chain** – European manufacturing capacity of wind and solar equipment.

## How this helps you

### Data

Can be accessed via:

**Cube Browser:** A proprietary desktop application designed to provide advanced access to the extensive energy databases

**Interactive web-based dashboards:** Global data in user-friendly interfaces to analyze European renewables and power markets and supply chains

**Model:** Fully editable, transparent, Excel-based model designed for analyzing renewables projects economics

- ✓ PowerCube
  - Australian asset-level coverage for all power-generation sources
- ✓ Australia – Watts Generating Dashboard
- ✓ New Zealand – Watts Generating Dashboard
- ✓ Australia Power & Renewables Project Analysis Dashboard
- ✓ Australia NEM & WEM Price Forecast Dashboard
- ✓ Australia Power Purchase Agreements Dashboard

- ➔ **Compare projects**, suppliers and operators
- ➔ Perform **deal screening** within the solar and wind markets
- ➔ Benchmark **the competitive landscape**
- ➔ Evaluate **renewable energy projects**
- ➔ Understand **the market share of EPCs, Developers and OEMs**.
- ➔ Quickly and easily retrieve information

### Analytics

**Renewables & Power Analytics:**  
A comprehensive library of expert reports and commentaries

**Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant**

- ✓ Monthly reports
  - Australia Renewables & Power Trends Report
- ✓ Regular commentaries
- ✓ Ad hoc reports
- ✓ Periodic reports

- ➔ Examine **the key trends in the Australian renewables and power markets**
- ➔ Get timely analyses of **key renewable energy topics**
