

# Upstream Northwest Europe Solution

A comprehensive data and analytics offering that provides a holistic view of energy activity in Northwest Europe

With Rystad Energy's Upstream Northwest Europe Solution, you can access data on upstream activity, rig activity, the performance of production wells, upstream emissions, electrification projects, CCUS, and more, enabling comprehensive analyses of Northwest Europe as an upstream region

→ Request a demo

- Gain new insights into production trends, using both historical and forecast data
- Benchmark the upstream emissions from operations for different operators or facilities
- Screen for CCUS storage assets from depleted O&G fields and saline aquifers to provide EOR or permanent storage opportunities
- Coverage has been expanded to include the Netherlands, in addition to Norway, the UK, and Denmark
- Access to monthly and annual production data that is available at the well level

# Upstream Northwest Europe

## Solution coverage

## What is included

## How this helps you

### Data

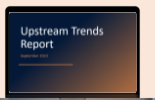

Can be accessed via:  
Our proprietary Cube browsers: Gain deep and granular insights using our proprietary databases

Interactive web-based dashboards: Access data in easy-to-use interfaces curated for your workflows

**Models:** Fully editable, transparent, Excel-based models designed for better decision-making

- ✓ **Detailed** field-level economic and technical evaluation and opportunities screening to provide an independent view of asset NPVs
- ✓ **In-depth** competitor portfolio analysis and performance evaluation
- ✓ **Access historical and forecasted activity data**, such as well counts, drilling days, exploration spending, awarded acreage and licensing rounds

- ➔ **Obtain and benchmark data** on companies, hubs or assets, such as resources, timelines, capacity, breakeven prices and NPV
- ➔ **Understand how emissions** have developed over time and examine the source, whether it is from extraction or flaring
- ➔ **Understand different storage assets**, including their timeline, storage type, and reservoir characteristics

### Analytics

Stay up to date on all aspects of the upstream industry through our trends reports, asset reports and frequent value-adding commentaries, offering analysis of recent industry news and developments, all prepared by leading industry experts.

Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant

- ✓ **Upstream Asset Reports**
- ✓ **Factsheets and commentaries** on recent research and detailed regional analysis
- ✓ **Gain access the Business Development Atlas**, which provides a monthly update on Exploration, M&A and Field Development

- ➔ Stay up to date on key trends shaping the North Sea basin to enhance the information available in data solutions
- ➔ Understand the impact of the energy transition on the upstream industry through our market insights
