

# Brazil Oil and Gas Solution

From well-level productivity to top-line trends. A one-stop shop solution for the Brazilian E&P market

**With Rystad Energy's Brazil Oil and Gas Solution** extract key insights leveraging clean and consistent datasets. Our comprehensive offering covers the entire Brazil E&P industry, allowing a vast range of analysis: from field-level valuation to country-level trends

→ Well-by-well historical and forecasted production split by hydrocarbon. Well-level productivity analysis with EUR estimates and Arps modelling parameters

→ Coverage of the licensing activity and exploration drilling, with metrics for discovered volumes, investment levels, and finding cost

→ Asset-level economic analysis with valuation under different price scenarios. An Excel-based economic Model can be exported to further support asset valuation

→ Workflows to assess investment trends, operational costs, benchmark companies, and benchmark Brazil with other countries

→ Supporting data with M&A coverage of all transactions in the country, emission intensity at the field level, and rig activity on the Brazilian coast

→ Request a demo

# Brazil Oil and Gas Solution

## Solution coverage

## What is included

## How this helps you

### Data

Can be accessed via:  
Our proprietary Cube browsers: Gain deep and granular insights using our proprietary databases

Interactive web-based dashboards: Access data in easy-to-use interfaces curated for your workflows

**Models:** Fully editable, transparent, Excel-based models designed for better decision-making

✓ **Access to the Upstream Brazil Analysis dashboard** to obtain a full overview of the upstream activity in Brazil

✓ **Obtain and benchmark data** on companies, basins, or assets, such as resources, timelines, investment, breakeven prices, and NPV

✓ **Assess well-level productivity** and how EURs evolve over time

→ Country-level trends on both the **exploration** and **production** segments

→ **Detailed field-level** economic evaluation and opportunities screening

→ All resources at one place and in a **single cohesive database**

**Understand how emissions** have developed over time and examine the source, whether it is from extraction or flaring

### Analytics

Stay up to date on all aspects of the upstream industry through our frequent value-adding commentaries, offering analysis of recent industry news and developments, all prepared by leading industry experts

Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant

✓ **Custom-made analysis**, such as the reserves replacement series, analyzing the opportunities and challenges for Brazil to tackle the challenge to replenish its reserves

→ **Insights** that help in the understanding of the market

→ **Quick and meaningful** analysis reacting to recent industry news
