Shale Solution

Visualize detailed North American well data,
enhanced with near real-time activity monitoring

Introduction

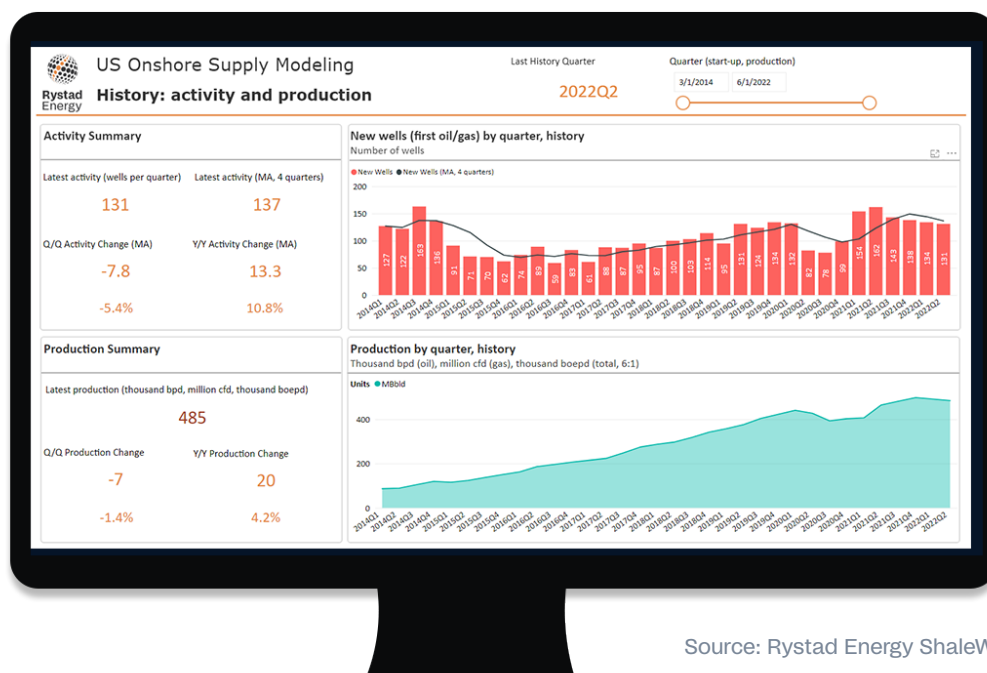

Explore our complete and robust solution covering the entire North American shale industry, delivered through our daily updated database, as well as analytics and advisory services.

Obtain complete and detailed North American well data enhanced with near real-time satellite-based oilfield activity monitoring, thus providing a 360-degree perspective of this dynamic market, from drilling and completion operations to production and project design data, all of which can be correlated with well performance.

Products included

	ShaleWellCube	Shale Analytics
Granularity	Well Level	
Companies coverage	3200+

Key benefits

✓
Analyze the entire upstream space, well-by-well, for North America and Argentina

✓
Obtain proprietary research data points such as well economics, forecasts, and completion data

✓
Gain access to our expert analyst team with critical insights to support your data analysis needs

Source: Rystad Energy Shale Analytics

Key solution features

Forecasted production well-by-well, leveraging asset-level guidance, individual well declines, and inventory quality

Real-time activity trends (i.e. satellite imagery analysis for completion modelling, live data feeds from drillers, up-to-date permitting information)

Operational efficiency metrics such as stimulation times, drilling speed, and cycle times

Clean completion data merged from various sources, such as state reports, chemical disclosures, and investor presentations

Providing a dedicated service to key industries

Energy
Companies

Banking

Suppliers

Traders

Investor

Government
