

RystadEnergy

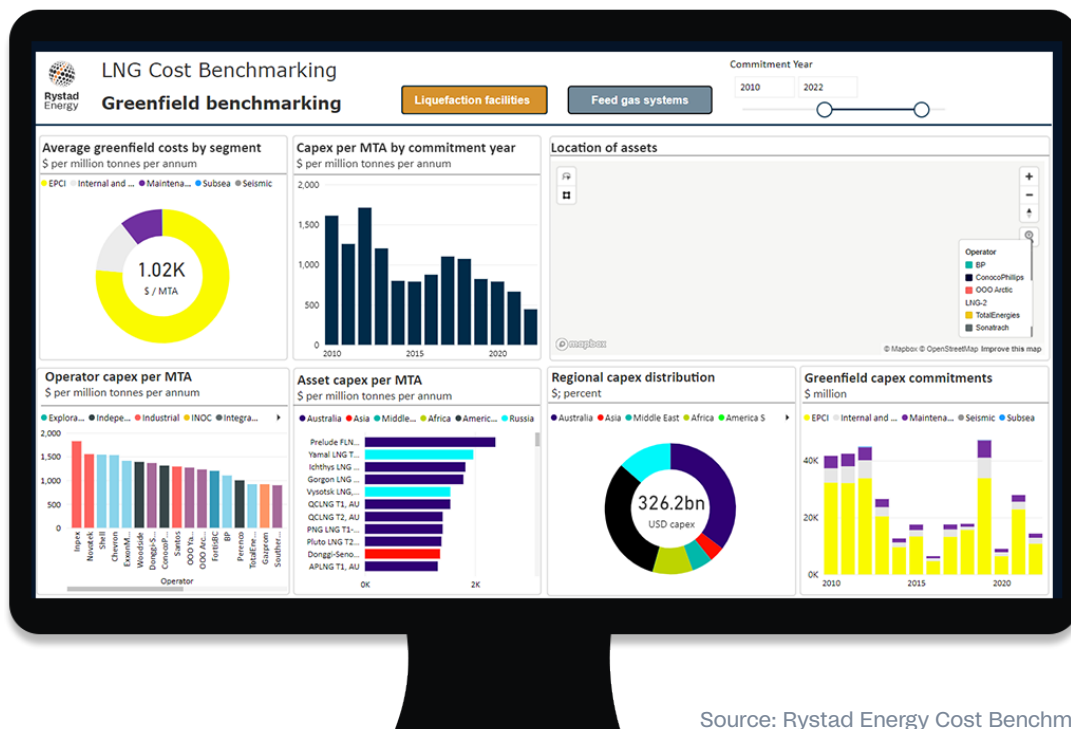

Cost Benchmarking Solution

Benchmarking of cost performance within the supply chain, and forecasting future cost trends

Introduction

Our solution offers insights into project cost benchmarking intelligence through analytics, data and advisory services focusing on the energy supply chain – both onshore and offshore.

Our cost benchmarking views are channeled through thematic reports, detailed factsheets, a steady flow of commentaries and bottom-up databases that are updated monthly.

Key benefits

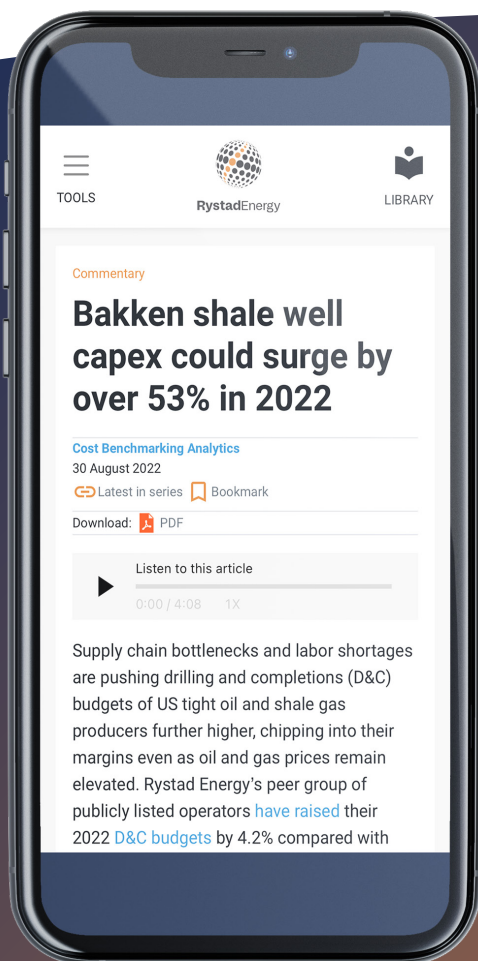

✓
Benchmark field-level costs for offshore, onshore and LNG projects

✓
Understand potential operator budgets within select geographies before you tender

✓
Evaluate internal project cost performance against industry norms

✓
Anchor tenders to best-in-class project cost performance from similar, historical or upcoming projects

✓
Identify internal cost savings opportunities by understanding detailed industry cost performance

Key solution features

Global coverage of bottom-up, project-by-project data

Cost benchmarks for reserves, production, surface facilities, subsea equipment, SURF lines, drilling & completions, and much more

Labor rates for hundreds of job descriptions across the energy supply chain

Prices on thousands of key materials and equipment

Providing a dedicated service to key industries
