

# Subsea

**A comprehensive, field-by-field global database covering subsea structures and components for upstream operators**

With Rystad Energy's Subsea Solution, gain market intelligence for production systems, historical and upcoming projects, processing equipment, SURF lines and subsea-services market.

- ✓ Market drivers and purchases, including regional and oil price sensitivity analysis
- ✓ Subsea contracts analysis with contract type and supplier prediction for upcoming projects
- ✓ Key parameters such as water depth, facility and field type, resource type, field breakeven and field size

## Key workflows

Analyze **past projects** and explore upcoming developments that are not yet sanctioned

Find **opportunities** by analyzing subsea spending historical development and future trends

Estimate probability of future **contracts winning**

Benchmark **upcoming subsea projects** with similar projects worldwide

Identify subsea processing and electrical heating candidates among upcoming projects

Research the **demand** by geography, subsea component type, design, number and kilometer of units, operator, water depth and much more

## Solution Coverage

### Data

Can be accessed via:

**Our proprietary Cube browsers:** Gain deep and granular insights using our proprietary databases

**Interactive web-based dashboards:** Access data in easy-to-use interfaces curated for your workflows

**Datafeed integration:** via ftp, OData or Snowflake

### Analytics

A comprehensive library of expert reports and commentaries:

**Subsea market report** with recent trending topics, recent and upcoming contract awards, market drivers and segment overviews

Oil and gas project **factsheets**

**Commentaries** about market events and hot topics in the subsea industry
