

Batteries Solution

Bottom-up and global solution covering the entire battery value chain in products and consulting

With Rystad Energy's Batteries Solution, you can access a granular and bottom-up global database covering the entire battery value chain, from mining, refining, precursor, electrode to cell production forecast and capacities.

✓ Deep insights into the global battery material processing/PCAM/CAM manufacturing

✓ Global EV sales and energy storage trackers by country

✓ Analysis of car manufacturers, including sales targets

Key workflows

Understand how battery materials mines – nickel, lithium, cobalt, graphite – are set to develop and new mines that will enter over the next ten years

Determine how quickly Europe and the US could develop their own battery supply chain

Assess cost developments through the supply chain by following our proprietary battery raw material, processing prices and cost breakdown

Foresee market fundamentals and price trends of key battery metals

Follow current events closely and understand the market dynamics with monthly extensive reports and weekly commentaries

Solution Coverage

Data

Can be accessed via:

Interactive web-based dashboards: Access data in easy-to-use interfaces curated for your workflows

Analytics

A comprehensive library of expert reports and commentaries

Monthly and quarterly reports examining the global and regional battery metals and materials landscape

Regular commentaries and detailed analyses on the battery market and key materials, offering insights on a global, regional and industry-level
