Price Inflation Solution

Dynamically evaluate pricing and market risks from labor, materials, equipment, manufacturing, and more across all industries

In an era of rapid inflation, strategic decisions start with clear market visibility. Rystad Energy's Price Inflation Solution empowers procurement teams to assess risk and uncover savings with access to 35,000+ indices and bottom-up data across labor, materials and equipment globally and in real time.

➔ Global Coverage: Track pricing trends across 150+ service segments and 25+ countries.

➔ Contract Normalization: Standardize contracts using 35,000+ regional and monthly indices.

➔ Margin Transparency: Analyze supplier margins to ensure fair pricing.

➔ Custom Models: Build tailored cost models with dynamic risk scenarios.

➔ Live Data Access: Monitor real-time costs via dashboards or datafeed integrations.

Solution coverage

Data

Can be accessed via:

Interactive web-based dashboards and Cubebrowser:
Access data in easy-to-use interfaces curated for your workflows

What is included

- ✓ EscalationCube and Oil & Gas PriceInflationCube
- ✓ Labor Market Trends
 - Evaluate regional-specific labor supply, demand and rates across the supply chain.
- ✓ Service Price Inflation Analysis
 - Price inflation analysis within the energy supply chain
- ✓ Trade and Tariff Analysis
 - Navigate evolving trade & tariff tensions through bottom-up commodity volumes and unit rates

How this helps you

- ➔ Anticipate labor risks and cost pressures by evaluating regional labor supply, demand, and rates, enabling more innovative execution strategies, fair rate benchmarking
- ➔ Negotiate smarter, fairer contracts by using real market data and custom indices to benchmark costs, choose optimal compensation types, and reduce pricing disputes across the bid-to-award process
- ➔ Strengthen supply chain strategy by identifying equipment trade flows, spotting disruption risks and uncovering country-level import dependencies

Analytics

A comprehensive library of expert reports and commentaries

Enhance productivity and unlock actionable insight with AskRystad, our AI-powered assistant

- ✓ Quarterly Service Price Inflation Report provides an in-depth analysis of productivity by key operators and market outlook
- ✓ Expert commentaries and thought-leadership articles on tariff tracking and the global supply chain market shift

- ➔ Stay ahead of market trends: Access quarterly reports that track the region's potential
- ➔ Understand policy and strategy shifts: Gain expert perspectives on regulatory developments
