

Oil Macro Analytics

➔ **Stay sharp with** weekly oil demand, refining spreads and China and Russia market notes to act before markets move

➔ **Spot what others miss** with monthly supply, demand and refinery intelligence, from crude trade flows to global balances

➔ **Get a quarter ahead** with refinery margin signals and a forward outlook that sharpens run planning and hedging strategy before the window closes

➔ **Track regional market dynamics** across China, the Atlantic Basin, NGL, naphtha and marine fuels with the depth to benchmark assets and spot where activity is accelerating

➔ **A comprehensive library** of weekly expert alerts and commentaries, monthly reports and quarterly macro scenarios reports. Covering oil macro, geopolitics, demand, supply, refining and pricing for faster, better decisions

When events like a Strait of Hormuz closure threaten supply, Oil Macro Analytics monitors the market impact, from crude trade flow signals to refinery runs and regional pricing, so you always know where the market stands.
