

Invisi-Rail™

Non-Penetrating Safety Guardrail System
Meets OSHA Requirements
1910.29(b) and 1926.502(b)

Features:

- Adapter allow the rails to fold down to the walking or working surface so it cannot be seen from ground level
- Adapters available for traditional metal bases or the Set and Prevent base
- No tools required, simply pin the adapter to the base and the rail to the adapter
- All needed pins are included
- Metal base adapter requires the use of “short leg rail” to be OSHA compliant, Set and Prevent adapter uses standard leg rail

The Originator

For more than 35 years, RailGuard 200 has been protecting workers at-height. RailGuard exceeds OSHA requirements for temporary and permanent guardrail applications.

Non-Penetrating

Maintain rooftop integrity with the weighted base design. Simply place the base in the desired location, drop in the rail section and pin it. No tools or drilling required.

Customizable

RailGuard 200 rails are available in a wide variety of lengths in safety yellow, galvanized or custom colors. Adjustable rails are the perfect way to end every run because its length can be adjusted on-site for a perfect fit. Add a self-closing or swing gate to complete your system.

Invisible and Compliant

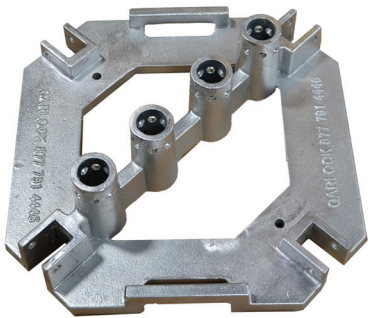

Invisirail adapters allow the guardrail to fold down so it will not be seen at ground level. Each system has been tested to OSHA standards with third-party verification.

It is the workers' responsibility to be OSHA compliant when lowering or raising the rail when near the fall edge. A mobile anchor point such as our LifePoint™ or Cobra Carts™ along with the appropriate safety equipment can be used if a permanent anchor point isn't available.

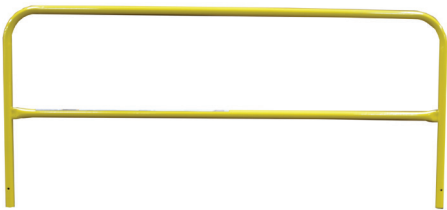

Why Choose Garlock?

- Rigorously Tested to Exceed OSHA & ANSI Standards
- In-House Engineering
- 100+ Years of Industry Experience
- Full Passive Fall Prevention Portfolio
- Custom Engineered Products Available

Features

Metal bases in yellow, galvanized or custom colored

Color matched short leg rails and adjustable rails available

Adapter come with all needed pins, two required per rail

Set and Prevent base: OSHA compliant, lowest cost, best value

Optional form fitting pad with integrate drainage for delicate roofs

Set and Prevent uses separate left and right adapters and standard leg rail

Invisi-Rail Components

407490	Invisi-Rail adapter for metal base, pins included, 2ea required per rail
411-003-601	Invisi-Rail adapter for Set and Prevent base, left side, all pins included
411-004-601	Invisi-Rail adapter for Set and Prevent base, right side, all pins included
155160	Metal base, without pads, safety yellow
407723	Metal base, with adhesive pads, safety yellow
155159	Metal base, without pads, galvanized
407724	Metal base, with adhesive pads, galvanized
407491S	10' short leg rail, yellow
407674S	8' short leg rail, yellow
407493S	5' short leg rail, yellow
408219G	10' short leg rail, galvanized
TBD	8' short leg rail, galvanized
408221G	5' short leg rail, galvanized
