

Application Design & Architecture Consulting

Let us help early on in your implementation to ensure your solution is designed and engineered using best practices. One of our AVEVA Select certified technical experts will review your requirements and the high-level and detailed designs for your AVEVA software solution, as well as supporting architecture and provide recommendations. This work will identify potential configuration or deployment related issues early in the project and prior to commissioning to ensure the solution is successful and supports your requirements.

\$15,000

Whether you are developing your own AVEVA solution or working with one of our integration partners, a thorough application design and architecture review can be instrumental in assuring the development efforts have a solid foundation. Considerations include:

- Security
- Performance
- Reliability
- Availability
- Flexibility
- Scalability
- Maintainability

Value

- Lower project costs caused by undetected design problems
- Less time spent troubleshooting runtime and system performance issues
- Reduce risk by knowing the solution designed meets your goals, objectives and requirements

What's Included

- Kickoff call to coordinate what will be needed from you and any integration partner(s) you may have to perform the service (access, documents, logistics, etc.)
- Review of requirements, definitions, high-level and detailed designs with the stakeholders of the solution - ensuring that everyone is on the same page as to what constitutes a "success"
- Review of the proposed architecture against AVEVA standards and best practices and identification of potential areas of concern
- Review of the proposed engineering design with an effort to apply AVEVA best practices
- Formal wrap-up meeting to discuss any recommendations our technical experts have identified accompanied by a detailed summary of the engagement, findings and recommendations
