

## Training Path Assessment

AVEVA's training curriculum includes hundreds of courses and learning solutions - both online and on-site - to help transfer the knowledge necessary for a successful and enduring AVEVA software implementation.

### Free for Customer FIRST Subscribers

With this offer, an AVEVA Select certified training expert will work with you to understand your organization's specific AVEVA product learning needs and preferred training delivery methods. This collaborative approach will allow our certified training expert to create a customized training path for your organization from our existing training courses. Our certified training is delivered in flexible ways which each provide certificates of completion.

Instructor-led training provides a hands-on and collaborative learning environment and includes interaction with instructors and other software users. Expert lectures and hand-on labs to practice and reinforce concepts and procedures help your learning experience. You can attend these courses face-to-face at our training location in Brookfield WI, or you can join instructors and other students remotely from your own location via a virtual classroom.
