

## Implementation Consulting

This time-based consulting service provides an AVEVA Select certified technical expert to ensure best practices are engineered into your solution for smooth and successful commissioning of new projects and maintenance and evolution of existing projects.

### Time-Based Charge

Implementation consulting provides an AVEVA Select certified technical expert to ensure your project is completed successfully and that your solution is set for long-term reliability and stability with minimal ongoing maintenance costs. We will work directly with your deployment team or system integrator. Implementation consulting is time-based and can vary from one week up to several months depending on the specific component services you select.

### What's Included

- Design and architecture review – for new systems or upgrades, this component service ensures post-implementation efficiencies, drives adoption and allows you to achieve the maximum benefit from your AVEVA software solution
- Pre-launch health check assessment – help reduce risk and unnecessary costs by resolving issues prior to commissioning your production system
- Custom requirements – address your unique project requirements and objectives with our technical experts providing direction
- Best practices and standards adherence – ensure that your solution follows best practices for AVEVA software and also adheres to any standards that you have previously established
