

The UI Redesign Demo is Here!

This is a special purpose instance that was created with the singular goal of allowing people to experience the redesigned UI (user interface) being released starting January 2023. It has data and roles from “Demo Builder” that has been upgraded to a 12.2 base and then had the 12.3 navigation applied to it. Truly some out-of-the-box thinking from our engineering team.

The personas to access the demo instance **including ID and PW (password)** can be found in the table below.

All the personas listed are read-only. Therefore, elements like the quick create “+” icon won’t respond to clicks, and menu options for creating objects (e.g. “Create Account”, “Import Contacts”) will not be displayed.

Try it out and submit feedback directly from the demo instance if you'd like!

Instructions:

1. Choose your Title/Role Type from the list below.
2. From the image below, take note of the ID and Password for the role type you have chosen.
3. Log in using the user name and password through [this link](#).
